

ADITI PARIKH

SEEKING JUNIOR WEB DEVELOPER POSITION

An imaginative, adventurous and fashion conscious web-developer deriving from an IT counselling and sales background with strong skills in communication and project management. Inspired by Mr. Robot, I always had a natural attraction towards IT especially for creating unique templates that will be used for a wide range of audience to view globally. As a result, I began my journey in the domain growing my technical and research skills, now seeking a role as a junior web-developer where I can develop and mature on the professional front.
